

Testing Planning

wrong QA strategy
no Test Plan documented
lack of auto-testing

Lack of team members

lack of planning
illness
no seniors in QA

QA was not involved
(no Test Plan)
extended sprints
Big tasks need to be divided

Planning

no acceptance testing at the end of Sprint
no retrospective meeting

Unwanted / extra processes

Scrum Master absence

mess in the Product Backlog

no time to organize Backlog

lack of planning

mess in the Product Backlog

lack of experience

complicated requirements

risks weren't included

Too many tasks

(big scope + extra tasks)

Delay in Product Delivery

External Product Backlog dependencies

system integration delays

lack of planning

lack of communication

no QA risks

no QA risks

Estimation
